

KUMAR RISHABH

Varanasi, Uttar Pradesh

+91-9670674031

 kumarrishabhgupta01@gmail.com

 [KumarRishabh](#)

 [Portfolio](#)

Profile Summary

- Data Science student at IIT Madras with expertise in full-stack development, data analytics, and machine learning.
- Proven ability to lead teams as a Scrum Master, delivering scalable applications using Agile methodologies.
- Experienced in SQL, API testing (Pytest), and dashboard development, enabling data-driven decision-making.
- Strong problem-solving mindset with a blend of technical, analytical, and design skills.

Relevant Coursework

- Data Structures & Algorithms
- Machine Learning
- Database Management Systems
- Software Engineering
- Data Visualization
- Generative AI

Experience

Data Entry Operator - Uttar Pradesh Government

Sep 2023 - Feb 2024

- Processed and managed **10,000+ records**, maintaining >99% data accuracy.
- Reduced inconsistencies by implementing structured validation workflows.
- Improved data processing efficiency under strict deadlines.

Project Coordinator - Jal Kal Mission (Govt. Initiative)

- Coordinated project activities ensuring smooth execution and team collaboration.
- Managed data and reporting workflows for operational efficiency.
- Acted as a bridge between stakeholders and execution teams.

Projects

Software Engineering Full Stack Project (Agile-Based)

Flask, Vue.js, SQLite, Pytest, Figma, Canva

- Led a team of X members as Scrum Master, improving sprint efficiency by ~25%.
- Coordinated tasks, backlog management, and sprint planning using Agile practices.
- Performed API testing using Pytest, reducing backend bugs significantly.

- Designed responsive UI and improved UX through Figma-based prototyping.

LLM-Based Automation Agent (TDS Project 1)

Python, Flask, REST API, GPT-4o-mini, Docker, CI/CD

- Built an **AI-powered automation agent** capable of executing plain-English tasks.
- Integrated **LLM (GPT-4o-mini)** for multi-step task interpretation and execution.
- Implemented secure and deterministic workflows with **API orchestration**.
- Containerized using **Docker** and designed for CI/CD deployment.

ISCEP V2 – Influencer Engagement Platform

Flask, Vue.js, SQLite, Redis, Celery

- Developed a scalable platform handling campaign workflows and role-based access.
- Implemented Redis caching, improving response time by ~30%.
- Automated background processes using Celery, improving system efficiency.

Vehicle Parking Management System

Flask, SQLite, Bootstrap

- Built a system for parking lot management and automated spot allocation.
- Designed database schema for lots, spots, reservations, and pricing models.
- Enabled real-time booking and tracking of parking usage.

Placement Portal Application (Full System Design)

Flask, Jinja2, SQLite, Bootstrap

- Developed a role-based placement system for Admin, Companies, and Students.
- Implemented workflows for company approval, job postings, and student applications.
- Designed relational database for placement drives, applications, and company profiles.
- Enabled features like shortlisting, application tracking, and admin control panel.

Household Services Application (Advanced Full Stack)

Flask, Vue.js, SQLite, Redis, Celery

- Built a multi-user service platform with Admin, Professionals, and Customers.
- Implemented RBAC authentication and service request lifecycle management.
- Integrated Redis caching to improve performance.
- Developed **Celery-based async jobs** for: Daily reminder, Monthly activity reports, CSV export system
- Designed scalable backend architecture with batch processing capabilities.

System Threat Forecaster (Machine Learning Project)

Python, XGBoost, Scikit-learn

- Built an ensemble ML model using stacking techniques.
- Improved prediction accuracy through feature engineering and hyperparameter tuning.

Wholesale Store Data Optimization (Capstone)

Python, Excel, Docs

- Performed sales analysis and optimized inventory strategies.
- Delivered actionable insights for pricing and stock management.

SPG Project (IITM Coursework)

- Solved structured real-world problems using analytical and programming approaches.
- Focused on system design and optimized implementation.

Technical Skills

Analytical Tools: Excel, Power BI, Tableau, Docs, PowerPoint, Canva, Figma

Languages: Python, SQL, Java, JavaScript

Frameworks: Flask, Vue.js, Bootstrap

Technologies: Docker, Redis, Celery, Git, SQLite, SQLAlchemy

Other Skills:

- Agile (Scrum), Leadership
- API Testing (Pytest)
- Prompt Engineering
- UI/UX Design (Figma, Canva)
- Machine Learning & Data Analysis

Education

Indian Institute of Technology Madras

B.S. in Data Science and Applications

Jan 2023 - May 2026

VBSPU, Jaunpur

B.A. (Sociology) - CGPA: 7.45

2022 - 2025

Currently Pursuing:

M.A. (Sociology)

2025 - 2027

Certifications

- NPTEL – Data Mining
- NPTEL – Consumer Behaviour
- NPTEL – Soft Skills Development
- Google Cloud Platform (GCP) Workshop

Extracurricular

- Hindi poetry & English prose writing
- Strong blend of analytical + creative thinking
